

Alphacool Core 120mm fan PWM 4000rpm (120x120x25mm)

Alphacool article number: 24845

Quick Info

Alphacool's Core 120mm is a quiet and efficient fan with a wide control range up to 4000 rpm. The PWM controllable fan is not only suitable as a fan on CPU coolers or radiators. Due to its excellent performance values (throughput & static pressure), it can also be used as a case fan. The double-bearing fan axis is smooth running and enables a long service life as well as quiet operation. If you are looking for a powerful fan without aRGB illumination, you will find it in Alphacool's Core 120mm model!

- Double bearing for quiet and efficient running
- High air flow & static pressure
- Wide, via PWM controllable speed range

Scope of delivery

1x Alphacool Core 120mm fan PWM 4000 (120x120x25mm), black

Technical data

Dimension (L x W x H)	120 x 120 x 25mm
Material	synthetic material (PBT UL94V-0)
Bearing Type	Two Ball Bearing
Rated Voltage	DC 12V
Operating Voltage	DC 7-14V
Start-up Voltage	7V
Rated Current	0.53 (Max: 0.67) A
Rated Power	6.36 (Max: 8.04) W
Rated Speed	0 - 4000 rpm \pm 10%
Max. Air Flow	119.8 CFM
Max. Static Pressure	12.67 mm/H2O
Noise level	49.5 (Max: 51.5) dBA
Life Expectance	70000 h at 40 degrees celcius
Connection	4-Pin PWM
Speed Control Mode	via PWM
Operating Temperature	-10~+70 degrees celcius
Other Features	Tachometer Output, Auto Start, Soft Start, Waterproof Level IP22

Product pictures	24845_Alphacool_Core_120mm_fan_PWM_4000rpm_(120x120x25mm)_pics.zip
------------------	--

Packaging dimensions per unit

L x W x H	125 x 130 x 30 mm
Weight	200 g

Other data

Certificates	CE, FC, RoHS
EAN	4250197135870
Customs code	84145915000
Guarantee	3 years

Article text

Alphacool's Core 120mm is a quiet and efficient fan with a wide control range up to 4000 rpm. The PWM controllable fan is not only suitable as a fan on CPU coolers or radiators. Due to its excellent performance values (throughput & static pressure), it can also be used as a case fan. The double-bearing fan axis is smooth running and enables a long service life as well as quiet operation. If you are looking for a powerful fan without aRGB illumination, you will find it in Alphacool's Core 120mm model!

Connections

The fan is controlled via a 4-pin PWM connector. The cable is 40cm long. This allows the fan to be connected directly to the motherboard or a dedicated controller without the use of additional adapter cables or extensions.

Control range

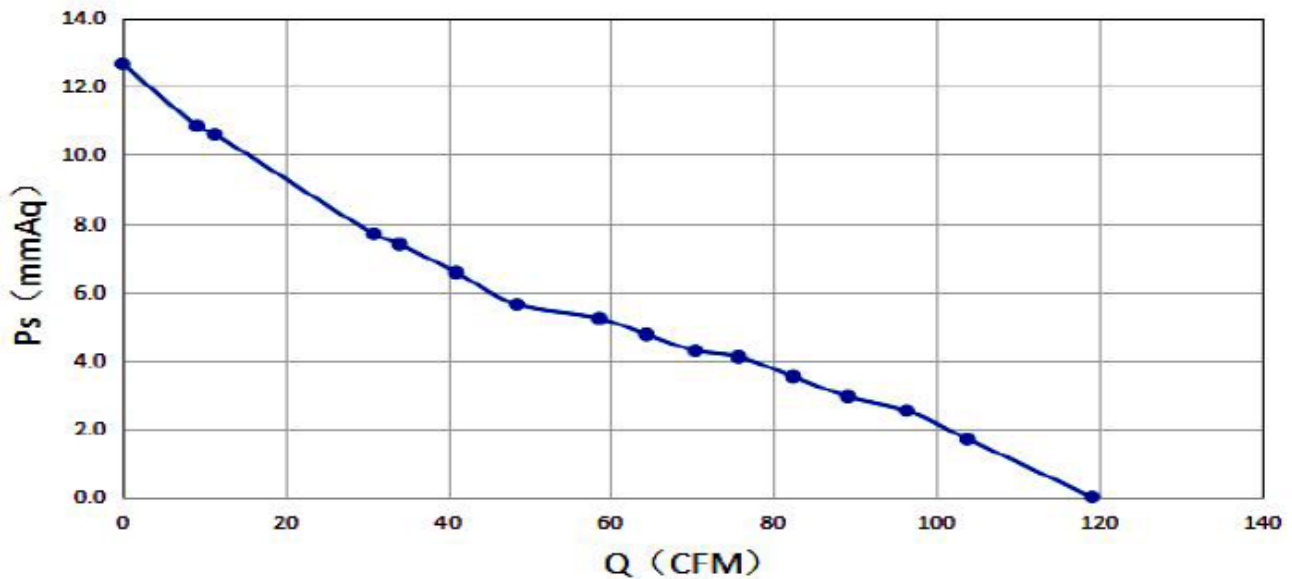

The fan can be controlled from 0 to 4000 rpm via the 4-pin PWM connector. At maximum speed, it allows an airflow of 119.8 CFM combined with a high static pressure of 12.67 mm/H2O. This makes the fan perfect for mounting on radiators of a water cooling system or for ventilating a case.
